# WHAT IS CYBERISLE?

CYBERISLE is a one-day annual conference hosted by The Office of Cyber-Security and Information Assurance (OCSIA).

Established in 2017, OCSIA is responsible for developing the Island's cyber-resilience which includes working with private and third-sector organisations and alongside the wider population. The conference brings together leading experts in the field of cybersecurity to share knowledge and insights on the latest trends, technologies, and best practices for protecting against cyber threats.

Topics covered at CYBERISLE include emerging technologies, threat intelligence, incident response, risk management, compliance, and information governance. The conference is open to anyone interested in cybersecurity and information assurance from the general public, businesses, and community groups.

# WHY WE RUN CYBERISLE

In today's digital age, cybersecurity has become a critical concern for individuals, organisations, and governments worldwide. With an increasing number of people relying on the internet for work, communication, entertainment, and shopping, the need for cybersecurity awareness and education has never been more important.

By educating the population about these threats, we can minimise the risk of cybercrime and protect our sensitive information from falling into the wrong hands. Moreover, cybersecurity education is not just essential for personal safety but also for the safety of businesses and government agencies. Cyberattacks are a major threat to organisations of all sizes and without proper education and awareness, employees are more likely to fall victim to cyberattacks. By investing time in cybersecurity education for employees, companies can reduce the likelihood of a breach and protect their valuable data.

CYBERISLE aims to provide attendees with a platform to learn from some of the top cybersecurity professionals, network with peers from various industries, and gain valuable insights into the current state of cybersecurity and how to protect against cyberattacks.

The conference brings together professionals from different sectors, such as finance, healthcare, government, and technology, to share their experiences and learn from each other.

# WHY CYBERISLE IS A SUCCESS

The Isle of Man has a thriving financial services industry and is home to many businesses that operate in the Fintech and e-gaming sectors. These industries are highly-dependent on secure and reliable technology systems, making cybersecurity of paramount importance for the Island's economy.

CYBERISLE has consistently received positive feedback owing to the topics covered, the quality of the presentations, and the focus on education and awareness. With high attendance each year, CYBERISLE is well-supported by the Island's community and goes from strength-to-strength.

# SPEAKING AT CYBERISLE

We invite speakers across industries to come and speak at CYBERISLE. Our speakers are experts in their subject and offer valuable insight into the relevant topics to all those who attend CYBERISLE.

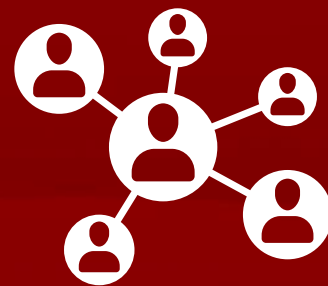

CYBERISLE 2022 included such speakers as Eleanor Fairford, the Deputy Director for Incident Management for the National Cyber Security Centre (NCSC). Another feature of the conference held throughout the day were the lively panel discussions on a range of topics that included ransomware, cyber skills, and third-party suppliers. These panels comprised experts in cybersecurity, information governance and education.

Speaking at CYBERISLE offers a fantastic opportunity showcase your knowledge in your specialist subject area. With a highly engaged audience, choosing to contribute to CYBERISLE will demonstrate your commitment to improving the Island's cyber resilience.

# SPONSORSHIP

Thank you to our previous sponsors for supporting CYBERISLE. Working in partnership, we have been able to provide a platform for individuals and businesses to learn about the latest cyber threats and techniques to protect themselves.

As we prepare for the next CYBERISLE, we are looking for sponsors to help us continue our mission of educating and strengthening the cybersecurity community. By supporting CYBERISLE, you are not only helping to make the conference possible, but you are also investing in the safety and security of the Island and its people.

Cybersecurity is a critical issue that affects everyone, from individuals to businesses to government organisations. By sponsoring this unique event, you will have the opportunity to contribute to the greater good and show your commitment to the safety and security of individuals and organisations. With a prominent role for your brand at CYBERISLE, you will demonstrate your dedication to social responsibility and community engagement. Sponsors will also take advantage of an opportunity to network with key players in the cyber security space.

If you're interested in sponsoring CYBERISLE, please visit [www.ocsia.im/cyberisle](http://www.ocsia.im/cyberisle) and download our sponsorship pack or email [cyberisle@gov.im](mailto:cyberisle@gov.im) for more information.
