

# PREPARE FOR CYBER MONDAY AND BLACK FRIDAY

## SHOP FROM A SECURE COMPUTER

Ensure your devices are protected from malware by keeping your anti-virus software up to date.

## USE GUEST ACCOUNTS

Use a guest account rather than creating an account when purchasing from a website. If you choose to create an account, make sure you use a strong password.

## USE TRUSTED VENDORS

Limit your shopping to established and trusted vendors.

## DONT BE RUSHED

Avoid clicking links or making purchases that put pressure on you to buy a product.

## SHOP USING A SECURE CONNECTION

Make sure the website you use has 'https://' or a padlock sign. While it does not necessarily mean the website is legitimate, it means your connection is secure.

## DONT FALL FOR 'TOO GOOD TO BE TRUE' DEALS

Be wary of emails, text messages, pop-up browser windows and social media ads promising unbelievable savings.

AWARE

SECURE

RESILIENT
